

## Dataset used

Snitch fashion sales and employee

## Cleaning steps

- Removed duplicates
- Handled missing values using average, mean, or mode
- Fixed data type errors (dates, numbers)
- Trimmed extra spaces with TRIM()
- Standardized text format using PROPER(), LOWER(), UPPER()
- Corrected spelling and inconsistencies with Find & Replace

## Formulas used

- Basic: SUM(), AVERAGE(), MIN(), MAX(), COUNT()
- Conditional: IF(), SUMIF(), COUNTIF(), AVERAGEIF()
- Text: LEFT(), RIGHT(), MID(), UPPER(), LOWER(), PROPER()
- Date/Time: TODAY(), NOW(), YEAR(), MONTH(), WEEKDAY(), DATEDIF()
- Lookup: VLOOKUP(), XLOOKUP(), INDEX(), MATCH()

## Key insights

- Clean dataset improved accuracy of sales and employee reporting
- Identified top-performing employees and highest/lowest sales values
- Calculated average sales and employee tenure for better workforce planning
- Standardized text and corrected errors ensured reliable lookups and analysis

## Snitch Fashion Sales Dashboard Summarization:

### *Sales Growth Over Time:*

Sales have steadily increased year-over-year, with 2023 contributing the highest (41%), followed by 2022 (31%). This shows strong recent performance.

### *Top Performing Categories:*

T-Shirts lead in both average profit and average value, indicating high profitability and consistent sales.

Dresses and Accessories also show strong profit figures.

### *Profit Distribution:*

All categories show healthy profit margins, with Dresses and T-Shirts topping the chart. Even lower-selling categories like Accessories maintain solid profit levels.

#### *City-Level Sales Analysis:*

The dashboard allows filtering by city (e.g., Mumbai, Delhi, Bangalore), enabling localized performance tracking.

Useful for identifying high-performing regions and tailoring marketing strategies.

### **Employee Dashboard Summarization:**

#### *Departmental Distribution:*

Marketing has the highest number of employees, followed by Finance and HR. IT has the fewest.

#### *Performance Ratings vs Salary:*

Most employees are rated “Average,” with a salary around ₹68,000. “Poor” ratings have the lowest count and salary (~₹58,000), while “Very Poor” surprisingly shows a higher salary (~₹66,000), indicating possible anomalies or legacy pay structures.

#### *Salary by Department:*

Sales and HR departments show the highest total salary payouts, suggesting either higher headcount or better compensation.

#### *Geographic Spread:*

Employees are spread across six countries, with the largest group marked as “N/A” (possibly missing data), followed by India and UK.
